Art Unit: 3713

1. This action is in response to the US Application No. 10/715,005 filed November 17, 2003. It carries priority from US Application No. 10/174,789 now U.S. Patent No. 6,682,419, which is a continuation of US Application No. 09/689,495 now U.S. Patent No. 6,461,241 filed October 12, 2000.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-88 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-27 of U.S. Patent No. 6,461,241 and claims 1-61 of U.S. Patent No. 6,682,419. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of this instant application similarly recite a gaming device comprising a primary game and at least one secondary game being independently operated. Although the wordings in the claims in the US Patent Nos. 6,461,241 and 6,682,419 are somewhat different than the ones in the instant application, the claim features of the US Patent

Art Unit: 3713

6,461,241 and 6,682,419 are taught/disclosed by the instant application. There is no apparent reason why the Applicant failed to claim the symbol generators in the prior applications. Symbol generators are known devices included in gaming devices such as slot machines. It would have been obvious to include them in the gaming device in order to display the symbols located on the reels.
